F Diagram - Provide diagram here and include all setbacks

The foot print of the house is not changing. I don't have the setbacks. We are not expanding our foot print. We are trying to make this corner of the house more functional and provide ~~load~~ support for this corner of the house which presently sits on a pressure-treated post.

This section of wall is up & opened up with a 1' wall.

Below this space, we want to pour a slab enclosed with walls & door storage. This corner is presently supported by a 6x6 beam sitting on a concrete block. we are very concerned with the over all structure of the house.

The mudroom space is already house & under the roof of our structure.

Cantilevered extension of garage. wish to have a mudroom entrance from garage on main floor.
