

Appeal Period Expires 5/18/18
 Zoning District R1

Town of Essex, Vermont
Application for Zoning Permit
 www.essex.org

Application Date 1/1/18
 Permit Number 2018-081

All construction is to be completed in accordance with the Town of Essex Zoning Regulations and any/all federal or state regulations now in effect. You are required to post this permit in a conspicuous location on the property during the appeal period and it must remain posted throughout the construction period. **You are required to contact the necessary state agencies to obtain state permits @ 477-2241 (Jeff McMahon, Permit Specialist).**

Any interested person may appeal the decision of the Zoning Administrator to the Zoning Board of Adjustment within fifteen (15) days of the permit's date of issuance. Commencing construction within this fifteen (15) day appeal period is prohibited by law.

WASTEWATER SYSTEM AND POTABLE WATER SUPPLY PERMIT**LAWS/REGULATIONS INVOLVED**10 V.S.A. Chapter 64, Potable Water Supply and Wastewater System Permit
Wastewater System and Potable Water Supply Rules, Effective September 29, 2007
Chapter 21, Water Supply Rules, Effective December 1, 2010**Landowners:** Esad Boskailo
22 Old Stage Road
Essex VT 05452**Permit Number:** WW-4-3896-2Fatima Boskailo
22 Old Stage Road
Essex VT 05452

This permit affects the following properties in the Town of Essex, Vermont:

<i>Lot</i>	<i>Parcel</i>	<i>SPAN</i>	<i>Acres</i>	<i>Book/Page#s</i>
<i>1</i>	<i>2010051000</i>	<i>207-0657-1696</i>	<i>2.77</i>	<i>Book:948 Pages:782-783</i>

This project, consisting of a two lot, residential subdivision, Lot 1, 1.76 acres with an existing, one bedroom single family residence with a one bedroom accessory apartment utilizing an existing municipal water service and existing, individual, on-site wastewater disposal system and Lot 2, 1.01 acres for a proposed three bedroom single family residence utilizing a municipal water service and an individual, off-site (located on Lot 1), wastewater disposal system, located off Old Stage Road in the Town of Essex, Vermont, is hereby approved under the requirements of the regulations named above subject to the following conditions.

1. GENERAL

- 1.1 The project shall be completed as shown on the plans and/or documents prepared by High Knob Design Associates, LLC (Jeffrey Keeney), with the stamped plans listed as follows:

<i>Title</i>	<i>Sheet:</i>	<i>Plan Date</i>
<i>Site Plan</i>	<i>1</i>	<i>8/23/17</i>
<i>Details</i>	<i>2</i>	<i>8/23/17</i>

- 1.2 This permit does not relieve the landowner from obtaining all other approvals and permits **PRIOR** to construction including, but not limited to, those that may be required from the Act 250 Environmental Commission; the Drinking Water and Groundwater Protection Division; the Watershed Management Division; the Division of Fire Safety; the Vermont Department of Health; the Family Services Division; or other State departments and local officials.
- 1.3 The conditions of this permit shall run with the land and will be binding upon and enforceable against the landowner and all assigns and successors in interest. The landowner shall record and index this permit in the Town of Essex Land Records within thirty, (30) days of issuance of this permit and prior to the conveyance of any lot subject to the jurisdiction of this permit.
- 1.4 The landowner shall record and index all required installation certifications and other documents that are required to be filed under these Rules or under a specific permit condition in the Town of Essex Land Records and ensure that copies of all certifications are sent to the Secretary.
- 1.5 No permit issued by the Secretary shall be valid for a substantially completed potable water supply and wastewater system until the Secretary receives a signed and dated certification from a qualified Vermont Licensed Designer (or where allowed, the installer) that states:

"I hereby certify that, in the exercise of my reasonable professional judgment, the installation-related information submitted is true and correct and the potable water supply and wastewater system were installed in accordance with the permitted design and all the permit conditions, were inspected, were properly tested, and have successfully met those performance tests",

or which otherwise satisfies the requirements of §1-308 and §1-911 of the referenced rules.

- 1.6 Lot 1 is approved with the existing one bedroom single family residence with a one bedroom accessory apartment. No alterations to the existing building other than those indicated in this permit that would change or affect the water supply or wastewater system shall be allowed without prior approval by the Drinking Water and Groundwater Protection Division. Construction of additional nonexempt buildings including commercial and residential buildings is not allowed without prior permitting by the Drinking Water and Groundwater Protection Division and such permit may not be granted unless the proposal conforms to the applicable laws and regulations. No construction is allowed that will cause non-compliance with an existing permit.
- 1.7 Lot 2 is approved for the construction of one, three bedroom single family residence. No alterations to the existing building other than those indicated in this permit that would change or affect the water supply or wastewater system shall be allowed without prior approval by the Drinking Water and Groundwater Protection Division. Construction of additional nonexempt buildings including commercial and residential buildings is not allowed without prior permitting by the Drinking Water and Groundwater Protection Division and such permit may not be granted unless the proposal conforms to the applicable laws and regulations. No construction is allowed that will cause non-compliance with an existing permit.
- 1.8 Each purchaser of any portion of the project shall be shown a copy of the Wastewater System and Potable Water Supply Permit and the stamped plan(s), if applicable, prior to conveyance of any portion of the project to that purchaser.
- 1.9 By acceptance of this permit, the landowner agrees to allow representatives of the State of Vermont access to the property covered by the permit, at reasonable times, for the purpose of ascertaining compliance with the Vermont environmental and health statutes and regulations, and permit conditions.
- 1.10 Any person aggrieved by this permit may appeal to the Environmental Court within 30 days of the date of issuance of this permit in accordance with 10 V.S.A. Chapter 220 and the Vermont Rules of Environmental Court Proceedings.

2. WATER SUPPLY

- 2.1 Lot 1 is approved with the existing connection to the water supply system owned by the **Town of Essex** for **300 gallons** of water per day.
- 2.2 Lot 2 is approved for connection to the water supply system owned by the **Town of Essex** as depicted on the plan(s) stamped by the Drinking Water and Groundwater Protection Division. The project is approved for **450 gallons** of water per day.
- 2.3 This permit is based, in part, on a determination by the municipality that sufficient capacity exists in the municipal water supply and associated water distribution system to accommodate the design flow of this project. This permit does not imply that the municipality will grant allocation for the project subject to this permit to physically connect to or receive water from the municipal water supply. It is recommended the landowner forward a copy of the final municipal allocation to the Drinking Water and Groundwater Protection Division with the installation certification required by Condition 1.5 of this permit for inclusion in the project file.
- 2.4 The components of the potable water supply herein approved for Lot 2 shall be routinely and reliably inspected during construction by a qualified Vermont Licensed Designer (or where allowed, the installer) who shall, upon completion and prior to occupancy of the associated building, report in writing to the Drinking Water and Groundwater Protection Division that the installation was accomplished in accordance with the referenced plans and permit conditions, as specifically directed in Condition #1.5 herein.

3. WASTEWATER DISPOSAL

- 3.1 Lot 1 is approved with an existing wastewater system for **280 gallons** per day. No changes shall be made to the existing wastewater system unless prior approval is obtained from the Drinking Water and Groundwater Protection Division. Should the system fail and not qualify for the minor repair or replacement exemption, the landowner shall engage a qualified Licensed Designer to evaluate the cause of the failure and to submit an application to the Drinking Water and Groundwater Protection Division and receive written approval prior to correcting the failure.

- 3.2 Lot 2 is approved for the disposal of wastewater in accordance with the design depicted on the stamped plan(s) for **420 gallons** of wastewater per day. The system(s) shall be operated at all times in a manner that will not permit the discharge of effluent onto the surface of the ground or into the waters of the State. Should the system fail and not qualify for the minor repair or replacement exemption, the current landowner shall engage a qualified Vermont Licensed Designer to evaluate the cause of the failure and to submit an application to this office and receive written approval prior to correcting the failure.
- 3.3 The components of the sanitary wastewater system herein approved for Lot 2 shall be routinely and reliably inspected during construction by a Vermont Licensed Designer (or where allowed, the installer) who shall, upon completion and prior to occupancy of the associated building, report in writing to the Drinking Water and Groundwater Protection Division that the installation was accomplished in accordance with the referenced plans and permit conditions, as specifically directed in Condition #1.5 herein.
- 3.4 The corners of the proposed primary wastewater area(s) for Lot 2 shall be accurately staked out and flagged prior to construction with the flagging/staking being maintained until construction is complete.
- 3.5 Lot 2 is approved for a mound wastewater system provided the mound is constructed in strict accordance with the following conditions:
-
- a. ~~The mound system is to be located and constructed as depicted on the plans that have been stamped by the Drinking Water and Groundwater Protection Division.~~
- b. A qualified Vermont Licensed Designer shall inspect the mound system during critical stages of construction. This shall include the staking of the location of the mound, ensuring the site has been properly plowed prior to placement of the appropriate sand fill, the installation and testing of the distribution piping, final grading of the mound including side slopes, and pump station installation.
- c. The construction of the mound shall adhere to the guidelines set forth in Section 1-913(f) of the above referenced rules.
- d. Upon completion of construction, and prior to occupancy of any structure being served by the mound system, the inspecting consultant shall submit to the Drinking Water and Groundwater Protection Division a written certification stating the construction has been completed in accordance with the stamped plans and the permit.
- 3.6 The wastewater systems for this project is approved for domestic type wastewater only except as allowed for water treatment discharges. No discharge of other type process wastewater is permitted unless prior written approval is obtained from the Drinking Water and Groundwater Protection Division.
- 3.7 No buildings, roads, water lines, earthwork, re-grading, excavation or other construction that might interfere with the installation or operation of the wastewater systems are allowed on or near the site-specific wastewater system or replacement area depicted on the stamped plans. All isolation distances that are set forth in the Wastewater System and Potable Water Supply Rules shall be adhered to and will be incorporated into the construction and installation of the wastewater system.
- 3.8 The wastewater system, which is to serve Lot 2 is located on the lands identified as Lot 1. The land deeds that establish and transfer ownership of these parcels shall contain a legal easement which grants the purchaser(s) and any future owner(s) the right to enter upon the property for the construction, repair, maintenance and other such reasonable purposes as may arise regarding the wastewater system. Failure to properly execute the easement renders this permit null and void for any lot/the project conveyed without the proper easement. It is recommended that a copy of the executed easement be sent to the Drinking Water and Groundwater Protection Division.

Wastewater System and Potable Water Supply Permit
WW-4-3896-2

3.9 All conditions set forth in **Permit Number WW-4-3896-1** shall remain in effect except as amended or modified herein.
