

**Indian Brook Water Test Results:**

The water at Indian Brook is tested every two weeks through the Vt Department of Health. The Parks & Recreation Department tests the water in three different locations. The locations are identified on the map. The Department of Health has identified the acceptable level of E-coli at 77 parts/100ml for swimming. The test results from the three locations are posted below.

| <i>Tested Date</i> | <i>Tested Site</i> | <i>Results</i>                                   |
|--------------------|--------------------|--|
| 09-26-2018         | 1                  | 3 E.coli / 100 ml                                |
| 09-24-2018         | 1                  | 488 E.coli / 100 ml (re-sampled, see 09-26-2018) |
| 09-24-2018         | 2                  | 15 E.coli / 100 ml                               |
| 09-24-2018         | 3                  | 1 E.coli / 100 ml                                |
|                    |                    |  |
| 08-08-2018         | 1                  | 36 E.coli / 100 ml                               |
| 08-08-2018         | 2                  | 26 E.coli / 100 ml                               |
| 08-08-2018         | 3                  | 15 E.coli / 100 ml                               |
