 Comply By: 11/20/2017 Occ Granted: Conditional Hazard Index: Level 2
 Inspector: CHRIS A BOYD (S 58514)
 With: Keith Lavalley, Black Rock Superintendent; Ben Moffat, ASFM; Dave Sheeran, Capt. Essex Town F.D.

Violations and Notes

This was a final inspection of all dwelling units within the building. The following issues were documented and must be addressed as directed below:

- 1) A final Electrical Inspection is scheduled to be completed on Tuesday, October 24th. The approval for occupancy in this report is listed as "Conditional" and is tied directly to this inspection being completed and approval of the buildings electrical system being given by State Electrical Inspector Vincent Bent for occupancy purposes. Once approval is provided by Inspector Bent occupancy will then be considered granted.
- 2) All gas piping and service cables passing through the basement separation walls must be fire stopped in a listed manner. There were multiple wholes that were found to be unprotected at the time of inspection.
- 3) The rear steps to each unit currently have a riser height on the bottom and second step of 7-3/4 inches. The top step to the door opening has a riser height of 9 inches. The stairs must be replaced so the riser height is not more than 3/16 of an inch difference between steps and does not exceed 7-3/4" in height between steps and is not less than 4" between steps.
- 4) Some of the dwelling units did not have all of the handrails installed at the time of inspection. Verify when these handrails are completed. The basement stairs must have the handrails extended so the handrails provide the proper protection the entire length of the stairs as discussed.
- 5) The ramps that lead to the two end units must have their surfaces modified where the ramp runs adjacent to the deck surface so the risk for a trip potential is minimized as discussed. If this is not possible provide something that separates the deck area from the ramp.
- 6) The hot water heater vents must have bird screens installed in the vent terminations.
- 7) The attached "Final Construction Valuation Form" must be completed and returned with any additional fee, if owed. This must occur before any report can be issued when the above listed issues are corrected and verified.
